

### *Developing caregivers for women's ministries*

Most training for workers happens on the job, but many courses are available to assist them to grow. This training manual is extremely practical, with advice that will assist any worker in doing this type of ministry in a Christian context. This manual can be purchased and given to workers to study or used in one-day per week training. Although the course is specifically geared for work with prostitutes who are on drugs, much of the teaching can be applied generally.

### *About Marge Ballin*

Ever since she was born again out of the "hippie movement" and drugs in 1969, Marge has served in full-time ministry. She worked as a missionary in Amsterdam ministering to prostitutes and with Muslims from the Middle East.

For three years after coming home, Marge was involved in community development work with African women and their children.

After helping to launch Inter Outreach Ministries in 1991 she began reaching out to prostitutes again in Cape Town, South Africa. She now does a lot of inner city training on working with broken people, and especially on the problem of human trafficking.
